

Virtual MRF Tour

Steamboat Springs, CO

Visit sunny Colorado with us. Revolution Systems presents a virtual tour of its Steamboat Springs Material Recovery Facility. The system is less than a third of the cost of a full-sized MRF, costs a third less to operate, and requires a third of the space. The patented plant, featured at the 2019 EPA Innovation Fair, was designed to serve small towns far from conventional MRFs, but has been used in larger communities to save transportation costs and by thrift stores to sort donated consumer goods.

In 2021, Revolution will install 3 systems in the Rocky Mountain West, the Midwest and on the East coast. The interactive tour will cover the plant from start to finish and include features not possible in a conventional tour. Skip the hardhat and the PPE and enjoy the show!
